

# Ram Band (Weizmann Institute, Israel) Isospectral quantum graphs - a new construction method

**TIME:**

16 Jan 2008, 16:30

**LOCATION:**

HU-Berlin  
Institut für Mathematik  
Rudower Chaussee 25  
Raum 1.410

Can one hear the shape of a drum?' - we treat this famous question of Marc Kac from 1966 in the context of isospectrality of quantum graphs. We present an algebraic method for construction of isospectral graphs. Finally, it will be demonstrated how this method can be used to produce some new examples of isospectral families of graphs. This is a joint work with Ori Parzanchevski and Gilad Ben-Shach.
