

Dr. Olaf Post

Convergence results for almost one-dimensional spaces

TIME:

8 May 2007, 15:30

LOCATION:

Institut für Mathematik
Rudower Chaussee 25, Raum I.410
12489 Berlin

We consider a family of noncompact, thin manifolds converging to a metric graph. The thin manifold can either be a thin neighbourhood of the (embedded) quantum graph or be defined as a manifold without boundary (like the surface of a pipeline network approaching the metric graph). We will present convergence results of the associated Laplacians on functions and 1-forms, including norm resolvent convergence, convergence of the spectrum and convergence of resonances.
